

DIRECTOR OF CENTRAL INTELLIGENCE
SECURITY COMMITTEE

Research and Development Subcommittee
Document Destruction Working Group

23 May 1985

MEMORANDUM FOR: Phillip Eckman
Chairman, R&D Subcommittee

SUBJECT: Proposed Revision of Federal Specification FF-P-00810A

1. In furtherance of my Document Destruction Working Group's efforts to correct significant shortcomings found in Federal Specification FF-P-00810A w/3 Amendments, I have prepared the attached "Specification Comment Sheet". It contains information relative to the shortcomings of the specification and recommendations for change to alleviate the problems and uses the GSA designated form for submitting such information (GSA Form 2200, Feb 69).
2. The R&D Subcommittee has already concurred in the recommendations contained on the "Specification Comment Sheet"; however, it was felt that a formal piece of paper conveying these ideas was the best vehicle for passing this matter on to the Security Committee and subsequently on to the GSA.
3. Hopefully, the Security Committee will lend its weight to this matter and indorse the Comment Sheet forward to the General Services Administration for action via the Interagency Advisory Committee for Security Equipment. Request any indorsement stress our need for feed back on the status of this action, so as to prevent pigeon holing of the action.

PAUL W. Von STEIN
Chairman, Document
Destruction Working Group
